

# DEPTA DWR

Disinfectant detergent for surfaces  
without rinsing

## ADVANTAGES AND BENEFITS

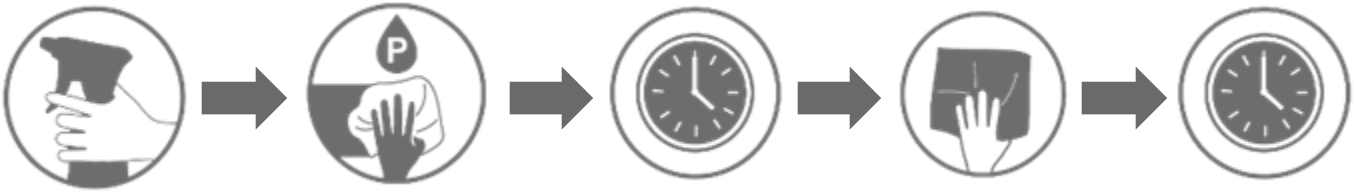

- No rinsing and quick drying time after application: formulated for dry environments where water supply must be controlled (powdered milk, bakery...)
- Ready-to-use product for simplicity
- Fast action: biocidal efficacy (2 minutes in dairy sector / 5 minutes in meat sector)
- Neutral pH for manual application
- Without oxydizing component to avoid food discolouration
- Non-corrosive for surfaces found in food industries
- Light and non-persistent foam for tracing during application, foam is easy to wipe off

Store in a dry cool place

# DEPTA DWR

## PROTOCOL

Spray, Spread on the surface, wait for bactericidal and yeasticidal activity, wipe the surface. Let the surfaces dry for at least 5 minutes after wiping.

## SUCCESS CASE In a pork meat processing industry

### BEFORE

Burnt fats

### Application of DEPTA DWR

Easy and quick to use

### AFTER

Perfect and shiny result

Cleaning and disinfection in 1 application:

Time-saving, less consumption of chemical and water

**Tip:** Can also be used in dairy industries (powdered milk) for cleaning and disinfection of powdered milk storage areas.
