

DEPTAL ACT

Non-foaming additive to alkaline solutions
for enhanced detergency

ADVANTAGES and BENEFITS

- Enhanced detergency: descaling, degreasing, complexing action
- Powerful action on mineral deposits thanks to its complexing agents
- Makes stainless steel shinier and reduces frequency of acid phases
- Wetting action for optimum efficiency in difficult areas
- Allows improved cleaning of thermal circuits and caustic soda tanks

Circulation

Store in a cool, dry place

DEPTAL ACT

PROTOCOL

Concentration: 0.1-4%

Temperature: according to equipment

Contact time: 10-20 min

SUCCESS CASE

In the evisceration area of a large poultry slaughtering and cutting plant

BEFORE

- Persistent grease in the workshop
- Many bacteriological problems
- An inefficient standard procedure

KERSIA METHOD PROPOSAL

DEPTAL ACT in daily use

Foaming
DEPTAL ACT

Pre-wash
warm water

Foaming
DEPTAL FM2

Rinsing

Spraying
DEPTIL PA 5

Rinsing

AFTER 1 MONTH OF USE

- ✓ Complete disappearance of persistent fats

Before / After
