

Acid disinfectant detergent for pipelines, fermentation vessels, storage tanks and bright beer tanks

# SOPURCLEAN CIP OP

## ADVANTAGES AND BENEFITS

- Based on methanesulfonic acid and medium chain fatty acids naturally present in beverages (e.g. milk, beer, cider etc.), **P-free** and **N-free**
- Bactericidal, yeasticidal
- Very good detergency power against **organic soiling** (yeast deposits and beer residues) and **mineral deposits** (beerstone and water hardness scale)
- Specially developed for cleaning tanks which contain CO<sub>2</sub>: does not react with CO<sub>2</sub> so there is no risk of vacuum decompression through neutralization
- Traceable via conductivity. Very stable use solution and low losses, with a minimum of topping up the use solution is re-usable for long periods of time
- Good wetting properties assuring a complete coverage of the surface during cleaning and disinfection
- Non-foaming & easy to rinse, reduced water consumption for rinsing and reduced risk of product residues
