

SOPURMASK

PRODUCT DESCRIPTION

Wax coating to mask scuffing on glass bottles

ADVANTAGES AND BENEFITS

Spray

Nonfood Compounds
Program Listed: P1
Registration Number:
156837

- SOPURMASK has strong scuff masking properties and a high wetting power which creates a **thin homogenous wax film** on the bottles. When the product dries it leaves an invisible film on the bottles.
- SOPURMASK limits greasy marks on the labels and the apparition of white drops after the bottles come out of the fridge.
- In the bottle washing machine, SOPURMASK is easily removed and has no influence on the foaming behavior of the caustic cleaning solution.
- SOPURMASK should be applied using our JETCOAT spraying equipment which is designed with high tech nozzles and intelligent pulse modulation resulting in very low product consumptions and guaranteed 360° coverage. The dosing is self-adjusting based on the line speed.
